

# INSTALL

---

## requirements

---

```
python==3.8.10
astunparse==1.6.3
```

If you want to run `usage.py`:

```
scikit-image==0.19.3
```

If you want to reproduce the results (see `reproducing_pipeline/` in the GitHub repository):

```
pytest==7.2.1
ray==1.11.0
```

## install

---

Clone the repository: <https://github.com/PyParTool/PyPar>.

Then, run:

```
python3 setup.py sdist
python3 setup.py install --prefix ~/.local/
```
